## DETAILED ACTION

### *Election/Restrictions*

1. Applicants' further election in the Response of March 30, 2004 of the species where A = -NCH<sub>2</sub>- is acknowledged. However, upon review of the scope of compounds encompassed thereby, it is noted that the X<sub>1</sub>-X<sub>4</sub> ring members can be C or N and the F ring member can be N, NCH<sub>2</sub> or CH<sub>2</sub>N, resulting in structurally diverse ring systems (containing phenyl, pyridinyl, piperidinyl, 1,2-, 1,3- and 1,4 diazinyl, triazinyl and tetrazinyl rings fused to 7- and 8-membered diazo rings) which themselves can be unsubstituted (all ring substituents B, D, E, G, J, K and L can be H). In view of the structural diversity and undue search burden, it is further required that applicants elected a single disclosed compound (where all the above variables are defined).

**Related structures and art-recognized equivalents will be grouped together for examination purposes. In the absence of significant prior art, remaining structures will also be grouped therewith.**

2. Applicants' cooperation with the continued restriction is appreciated.
